

An idea for placing your FAA SUAS registration number on your aircraft.

The number can be accessed without tools, but is hidden for privacy until it needs to be accessed. The next page contains labels. Print only page 2; cut out the number of labels for your planes; print your FAA SUAS number on the back of each; and apply them to your planes with packaging tape.

If a law enforcement officer needs to see the number, he/she can simply peel up the packaging tape to reveal your registration number.

What "the world" sees

Peel to see number

That's NOT my number!
